DETAILED ACTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, 33-39, drawn to a magnetic detection device.

Group II, claim(s) 18-27 and 40, drawn to a magnetic detection device.

Group III, claim(s) 28-32, drawn to a magnetic detection device.

Group IV, claim(s) 41, drawn to a method of producing a magnetic detection device.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of group I is a DC bias current being superimposed on an AC current is let to flow through the conductive wire; the special technical feature of group II is a third magnetic core formed on the other face of the first magnetic core and on the second conductive wire; the special technical feature of group III is magnetic bias means for applying a bias magnetic field in the direction parallel to the direction of a magnetic field to be detected to the first and second magnetic cores, and an AC carrier signal generator for flowing an AC current to the conductive wire in a direction perpendicular to

the magnetic field to be detected; the special technical feature of group IV is the alternating steps of forming magnetic cores, insulating film, and conductive films.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2862

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR
